Services

Tailored services

We make special products based on customers' drawing and we meet any kind of needs in terms of thermic treatment, burnishing and hot or electrolytic galvanizing.

KANBAN Warehouse

Kanban is a productive planning system where, on the one hand you try to prevent over-production in order to avoid a negative financial impact for the company, on the other hand you try to get rid of breakage in stocks which could delay or tackle productive process.

Micro supply

We manually meet a few requests. This allows us to place a no waste production on the market.

Delivery

We deliver in 24/48 hours by optimizing the internal productive process.

Bulloneria Villa has been producing and selling for 70 years

Our guidelines? Quality, dynamism, customer support and innovation.

Bulloneria Villa Spa **has been producing and selling tie-rods, screws, both lathe-shaped and pressed in common steels, steel hardening and tempering, stainless in ASME or ASTM, monel, hastelloy, inconel, incoloy, ni-tronic, duplex, superduplex, alloy, titanium.**

The company has developed over the years in order to keep up to date by widening its interest from producing standard bolts to creating more and more complex drawing details.

We are able to make special products based on customer's e design and meet all needs of any sort of thermic treatment, ball burnishing, electrolytic galvanizing.

It's essential the consultancy on choosing materials and treatments; on certifications and news in a sector which keeps updating. By doing so, "Bulloneria Villa Spa" has been able to gain its customers' trust: small ones, middle ones but also big companies around the National territory and outside it.

The market mainly aims at the final customer dealing with several sectors among which the energy one, the environmental one and the oil one. Companies mainly working on "orders" with very short time for supplying. Here, as well, Bulloneria Villa showed its dynamism to meet customers' needs by increasing its stock so as to deliver ready material.

For those customers needing minuscule drawing details we rely on our specialized factory which uses new generation automated equipment together with the lathe for filling up work, being able to meet most demanding customers' needs.

We have been certified ISO 9001 for years. Furthermore, our deep knowledge and our respect for the guidelines ruling the fasteners world is the grant we may offer to our customers. **We certify every single product out of our warehouse by tracking** the batch and the starting pouring and **we grant almost 0% of a scrap in our production.**

We carefully check all material both in and out, by monitoring sizes, some details and raw material tolerance; we verify some electrolytic covering thickness, which is basically a non-destructive monitoring. **With the help of our reliable laboratory which was also credited IIS QAS 018 certification, we test radioactivity of some components and we go through resilience tests.**

Based on an yearly supply contract, **we can re-stock our customers in a few days** as our organization allows us to keep in stock the right amounts ready for delivery and also to **manage customer's warehouse in Kanban way.** Furthermore for customers who are reachable in a day we directly manage their restocking at their warehouse by using our staff.

In 1946 Bulloneria Villa Spa leant on the production and trade bolt world.

Our guidelines? Quality, vitality, customer service and innovation. Over the years the company has developed in order to keep up with times by widening its own interest from ordinary bolt production to creating more and more complex drawing details.

The philosophy inspiring our work is to try and always establish a partnership with our customers.

We don't mean to be seen as simple vendors but as real partners cooperating with the production. Once, in the past, our production included standard fastening elements and special drawing products. Over the years, besides providing our customers at global level, we focused our production on making special bolts for both materials and treatments.

Fulfilling every single request, by speeding up the process and getting rid of useless costs, providing the customer with a top class service.
Of course every single product has its own trial certificate.

Certifications

We can provide certification for any product leaving our warehouses. Bulloneria Villa's quality system consists of 9001 ISO certification which was obtained in 2004. It follows the entire details production path from drawing to creation. Our company is capable of meeting every request by making the process efficient, getting rid of pointless costs and offering customers a top class service. Of course every single product goes with a test certificate.

Environmentally safety

The company's environmental strategy is based on the following principles:

- Optimising both energy sources and natural resources
- Minimising negative environmental impacts and maximizing the positive ones
- Spreading a culture in order to correctly approach environmental topics

A seventy year experience

70° 1946-2016

Bulloneria Villa was built in 1946 under the name Augusto Villa and C.in Milan, in Procaccini Street, producing and trading bolts and screws. In 1949 Angelo Doniselli joined in and production extended to two wheel components both pedal and engine, field where Mr Doniselli had been operative for long time.

We support the foundation:
